Chapter 1

Class Index

1.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

apisamplecode.APISampleCode 3
apisamplecode.NScAPIWrapper 3

Chapter 2

Class Documentation

2.1 apisamplecode.APISampleCode Class Reference

Static Public Member Functions

- static void main (String[ ] args)

2.1.1 Detailed Description

Author

franclin

2.1.2 Member Function Documentation

2.1.2.1 static void apisamplecode.APISampleCode.main (String[ ] *args*) [static]

Parameters

args	the command line arguments

The documentation for this class was generated from the following file:

- src/apisamplecode/APISampleCode.java

2.2 apisamplecode.NScAPIWrapper Class Reference

Public Member Functions

- NScAPIWrapper (String key, String userid, String webstoreUrl)
- String getUserID ()
- void getCustomerDetails (String email)

- void getShippingOptions (HashMap parameters)
- void getShippingAndTax (HashMap parameters)
- void getTaxForAnOrder (HashMap parameters)
- void insertWebOrders (HashMap parameters)

2.2.1 Detailed Description

Author

franclin

Date

04/02/2013

2.2.2 Constructor & Destructor Documentation

2.2.2.1 apisamplecode.NScAPIWrapper.NScAPIWrapper (String *key,* String *userid,* String *webstoreUrl*)

This is the constructor of the class Three parameters are needed to build an object of this type

Parameters

key	this represents your private. You should contact the NitroSell Support Team to request one.
userid	this represents your User ID as assigned by the retailer to which you would like to query his data
webstoreUrl	this is the URL of the WebStore that you would like to query

2.2.3 Member Function Documentation

2.2.3.1 void apisamplecode.NScAPIWrapper.getCustomerDetails (String *email*)

This method is the endpoint to get the customer details

Parameters

email	

2.2.3.2 void apisamplecode.NScAPIWrapper.getShippingAndTax (HashMap *parameters*)

This method is the endpoint to get the list of shipping options and any applicable tax The parameters of the request are passed in parameters tables

Parameters

parameters	

2.2.3.3 void apisamplecode.NScAPIWrapper.getShippingOptions (HashMap *parameters*)

This method is the endpoint to get the list of shipping options The parameters of the request are passed in parameters tables

Parameters

parameters	

2.2.3.4 void apisamplecode.NScAPIWrapper.getTaxForAnOrder (HashMap *parameters*)

This method is the endpoint to get the tax for a given order The parameters of the request are passed in parameters tables

Parameters

parameters	

2.2.3.5 String apisamplecode.NScAPIWrapper.getUserID ( )

This method returns the user ID

Returns

2.2.3.6 void apisamplecode.NScAPIWrapper.insertWebOrders (HashMap *parameters*)

This method is the endpoint to insert an order into the WebStore The parameters of the request are passed in parameters tables

Parameters

parameters	

The documentation for this class was generated from the following file:

- src/apisamplecode/NScAPIWrapper.java
